# THE COMPANY WITH THE **FUTURE INSIDE**

The present is performance, the future is the driver

Crediamo che la vera innovazione consista nell'attuare **processi e soluzioni che migliorino nel presente la vita futura** dei nostri clienti. Tecnologie davvero all'avanguardia, frutto dell'**entusiasmo** e della **passione** della nostra squadra, che possano **aumentare le capacità produttive** di chi ha necessità di resinare e lucidare ai ritmi frenetici che il mondo industriale richiede oggi.

Un pensiero d'innovazione continua, il nostro, volto a **minimizzare oggi i costi produttivi** degli impianti dei nostri clienti affinché possano **non temere il mercato del futuro** e la sua crescente competitività in termini di qualità, efficienza, velocità e volumi di produzione.

Da più di 30 anni siamo protagonisti della vera **innovazione tecnologica** nel campo dei trattamenti e delle lavorazioni superficiali di lastre di pietra naturale.

L'eccellenza delle performance dei nostri tanti clienti, in termini di **qualità del prodotto finito e volumi di business**, è la ragione che ci spinge ogni giorno a **migliorare** i nostri impianti e le **tecnologie** che li governano.

Ed è per questo che siamo entusiasti della bontà del nostro lavoro, confermato da tutte le importanti aziende che hanno voluto condividere con noi questa visione e che ogni giorno ci spronano a continuare su questa strada.

Un successo condiviso con ognuno di loro che ha visto una crescita costante, sana e continua del numero degli impianti Prometec installati in tutto il mondo e dei volumi di vendita dei nostri clienti. Ogni giorno, ogni singolo momento della nostra vita aziendale, agiamo come un unico organismo votato a migliorare i risultati di business dei nostri clienti.

**Un corpo sano ed in forma, guidato da un cuore che si alimenta di futuro.**

*We believe that true innovation entails implementing **processes and solutions that improve the future** of our customers, starting with **the present moment**.*

*The **energy and passion** of our team goes into developing genuine state-of-the-art technologies that can **increase production capacity** for businesses that require resin application and polishing capabilities at the fast-moving pace today's industrial world demands.*

***Nonstop innovation** is our calling, and it's focused on **minimizing the production costs of our customers' plants, right now**, so they can **fearlessly face the markets of the future** by giving them a competitive edge in terms of quality, efficiency, speed and volume of production.*

*For more than 30 years, we have been the leader in true **technological innovation** in the field of surface treatment and processing of natural stone slabs.*

*The outstanding performance of our many customers -- in terms of the **quality of the finished product and business volume** -- is the spark that drives us every day to improve our products and the **technologies** that control them.*

*This is why we are excited about the excellence of our work, validated by the major companies that have decided to share this vision with us and that encourage us every day to continue along this path.*

*A success we share with each and every business that has seen consistent, healthy, ongoing growth, and in the number of Prometec systems installed around the world. Not to mention the burgeoning sales volume of our customers.*

*Every day, every single moment of our corporate life, we act as a single unit, committed to improving our customers' bottom line.*

**A healthy, fit body, driven by a heart fueled by the future.**
